Notes:

1. R11-12: Use 1.2k for Toshiba power mosfet - low Vgs; improve thermal stability
2. R27-28: 4k7 to 10k: 50% Vcc will be on input jfets, good for +/-22V supply
3. 47R to 49.9R; use 49.9R as alternative
4. R5-6 change to 475R, improve bias tuning

Note that this F5 Turbo kit price is for stereo channels (2 channels)
